

MakerSpaceWest

Join us and be creative!

December 1, 2016

The MakerSpace is a movement started a number of years ago.

The idea was simple: Provide a space, the tools and an environment for hobbyists to create things they could not do with the resources available to them in their existing communities.

The idea spread quickly in the USA and Europe. Now there are also a number of these MakerSpaces in Canada and in British Columbia, some of the BC makers are listed here.

- Victoria MakerSpace: www.makerspace.ca
- Vancouver Hackspace: <http://vancouver.hackspace.ca>
- Vancouver: www.makerlabs.com
- Langley: www.fvmakers.com
- Surrey: www.makercube.ca
- Nanaimo: www.makerspacenanaimo.org

Please visit their web sites and find out if what they offer fits your creative drive.

We believe there is a need to be filled. We can build things, learn and teach and enjoy ourselves while having a lot of fun tinkering!

The MakerSpaceWest (MSW) supports and encourages innovation. For that, the MSW will be available to members for development of a product for manufacturing. Dedicated pages on our web-site will showcase these products and, space permitting, will be displayed at our workshop.

Attached are some ideas for possible activities and tools we need. Basic guidelines and rules are yet to be fully formulated. There is plenty of space for your comments and suggestions. We need your feedback to make the MSW successful!

We hope you get back to us with your suggestions soon!

Exchange Ideas, Expand Your Knowledge!
